PILLAR 3 REPORT FOR THE FINANCIAL PERIOD ENDED 30 SEPTEMBER 2013

Overview

The Group's Pillar 3 Disclosure is governed by the Group Disclosure Policy on Basel II Risk-Weighted Capital Adequacy Framework - Pillar 3 which sets out the minimum disclosure standards, the approach for determining the appropriateness of information disclosed and the internal controls over the disclosure process which covers the verification and review of the accuracy of information disclosed.

1.0 Scope of Application

The Pillar 3 Disclosure was prepared on a consolidated basis and comprises information on Alliance Bank Malaysia Berhad ("the Bank"), its subsidiaries and associate companies. The Group offers Conventional and Islamic banking services. The latter includes the acceptance of deposits and granting of financing under the Shariah principles via the Bank's wholly-owned subsidiary, Alliance Islamic Bank Berhad.

The basis of consolidation for the use of regulatory capital purposes is similar to that for financial accounting purposes, except for investments in subsidiaries engaged in nominees activities and sales distribution which are excluded from the regulatory consolidation and are deducted from regulatory capital.

There were no significant restrictions or other major impediments on transfer of funds or regulatory capital within the Group.

There were no capital deficiencies in any of the subsidiaries of the Group that were not included in the consolidation for regulatory purposes as at the financial period end.

The capital adequacy information was computed in accordance with BNM's Capital Adequacy Framework. The Group has adopted the Standardised Approach for credit risk and market risk, and Basic Indicator Approach for operational risk.

2.0 Capital

2.1 Capital Adequacy Ratios

The capital adequacy ratios of the Bank and the Group are computed in accordance with Bank Negara Malaysia's Capital Adequacy Framework issued on 28 November 2012. The Framework sets out the approach for computing regulatory capital adequacy ratios, as well as the levels of those ratios at which banking institutions are required to operate. The framework is to strengthen capital adequacy standards, in line with the requirements set forth under Basel III. The risk-weighted assets of the Bank and the Group are computed using the Standardised Approach for credit risk and market risk, and the Basic Indicator Approach for operational risk.

(a) The capital adequacy ratios of the Bank and the Group are as follows:

3.0 Credit Risk (contd.)

3.4 Assignment of Risk-Weights for Portfolio Under the Standardised Approach (contd.)

For the purpose of determining counterparty risk-weights, the Group uses external credit assessments from Rating Agency Malaysia ("RAM"), Malaysian Rating Corporation ("MARC"), Standard and Poor ("S&P"), Moody's and Fitch. In the context of the Group's portfolio, external credit assessments are mainly applicable to banks / financial institutions and rated corporations. The Group follows the process prescribed under BNM CAF-Basel II to map the ratings to the relevant risk-weights. The ratings are monitored and updated regularly to ensure that the latest and most appropriate risk-weights are applied in the capital computation.

The following tables show the rated exposures according to rating by Eligible Credit Assessment Institutions ("ECAIs") or as prescribed under CAF:
