Explanatory Notes

PART A - Explanatory Notes Pursuant to Malaysian Financial Reporting Standard ("MFRS") 134 and Guidelines on Financial Reporting Issued by Bank Negara Malaysia ("BNM")

A1 Basis of Preparation

The unaudited condensed interim financial statements for the financial period/year ended 31 March 2023 have been prepared under the historical cost convention, except for financial assets at fair value through profit or loss, financial investment at fair value through other comprehensive income, derivative financial instruments and financial liabilities designated at fair value through profit or loss that are measured at fair value.

The unaudited condensed interim financial statements have been prepared in accordance with MFRS 134 "Interim Financial Reporting" issued by the Malaysian Accounting Standards Board ("MASB"), Chapter 9.22 of Bursa Malaysia Securities Berhad's Listing Requirements and should be read in conjunction with the audited annual financial statements of the Group and the Bank for the financial year ended 31 March 2022. The explanatory notes attached to the interim financial statements provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of the Group and Bank since the financial year ended 31 March 2022.

The significant accounting policies and methods of computation applied in the unaudited condensed interim financial statements are consistent with those adopted in the most recent audited annual financial statements for the financial year ended 31 March 2022 and modified for the adoption of the following accounting standards applicable for financial periods beginning on or after 1 April 2022:

- Amendment to MFRS 16 "COVID-19-Related Rent Concessions beyond 30 June 2021"
- Amendments to MFRS 3 "Reference to the Conceptual Framework"
- Amendments to MFRS 116 "Proceeds before Intended Use"
- Amendments to MFRS 137 "Onerous Contracts - Cost of Fulfilling a Contract"
- Annual Improvements to MFRS 9 "Fees in the 10% Test for Derecognition of Financial Liabilities"
- Annual Improvements to MFRS 1 "Subsidiary as First-time Adopter"
- Annual Improvements to Illustrative Example accompanying MFRS 16 Leases: Lease Incentives

The adoption of the above standards, amendments to published standards and interpretations to existing standards did not give rise to any significant impact on the financial statements of the Group and the Bank.

The preparation of unaudited condensed interim financial statements in conformity with the Malaysian Financial Reporting Standards requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the unaudited condensed interim financial statements, and the reported amounts of revenues and expenses during the reported period. It also requires Directors to exercise their judgement in the process of applying the Group's and the Bank's accounting policies. Although these estimates and judgement are based on the Directors' best knowledge of current events and actions, actual results may differ from those estimates.

A32 Fair Value Measurements

(a) Determination of fair value and fair value hierarchy

MFRS 13 Fair Value Measurement requires disclosure of financial instruments measured at fair value to be categorised according to a hierarchy of valuation techniques, whether the inputs used are observable or unobservable. The following levels of hierarchy are used for determining and disclosing the fair value of the financial instruments:

Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 - inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3 - inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Group and the Bank recognise transfers between levels of the fair value hierarchy at the end of the reporting period during which the transfer has occurred. The fair value of an asset to be transferred between levels is determined as of the date of the event or change in circumstances that caused the transfer.

(i) Financial instruments in Level 1

The fair value of financial instruments traded in active markets is based on quoted market prices at the statements of financial position date. A market is regarded as active if quoted prices are readily and regularly available from an exchange and those prices represent actual and regularly occurring market transactions on an arm's length basis. This includes listed equities and corporate debt securities which are actively traded.

(ii) Financial instruments in Level 2

Where fair value is determined using quoted prices in less active markets or quoted prices for similar assets and liabilities, such instruments are generally classified as Level 2. In cases where quoted prices are generally not available, the Group and the Bank then determine fair value based upon valuation techniques that use market parameters, including but not limited to yield curves, volatilities and foreign exchange rates, as inputs. The majority of valuation techniques employ only observable market data and so reliability of the fair value measurement is high. These would include government securities, corporate private debt securities, corporate notes and most of the Group's and the Bank's derivatives.

(iii) Financial instruments in Level 3

The Group and the Bank classify financial instruments as Level 3 when there is reliance on unobservable inputs to the valuation model attributing to a significant contribution to the instrument value. Valuation reserves or pricing adjustments where applicable will be used to converge to fair value.

The valuation techniques and inputs used generally depend on the contractual terms and the risks inherent in the instrument as well as the availability of pricing information in the market. Principal techniques used include net tangible assets, net asset value, discounted cash flows, and other appropriate valuation models. These include private equity investments.

The following table shows the impact of netting arrangements on:

For the financial assets and liabilities subject to enforceable master netting arrangements or similar arrangements, each agreement between the Group and the Bank and the counterparty allows for net settlement of the relevant financial assets and liabilities when both elect to settle on a net basis. In the absence of such an election, financial assets and liabilities will be settled on a gross basis, however, each party to the master netting agreement or similar agreement will have the option to settle all such amounts on a net basis in the event of default of the other party.

B2 Review Of Performance

(a) Business Review for the year ended 31 March 2023

Profitability

The Group's net profit after taxation was RM677.8 million for the financial year ended 31 March 2023, an increase of RM105.0 million or 18.3% year-on-year ("YOY"). The higher profits were largely due to higher net interest income and lower allowance for expected credit losses.

Net interest income improved by RM172.4 million or 11.6% YOY mainly due to higher loan growth and the increase in the Overnight Policy Rate ("OPR"). Net interest margin ("NIM") came in higher at 2.64% (FY2022: 2.53%).

Loan Growth

The Group's loans, advances and financing grew by 6.2% YOY to RM49.1 billion. The growth was mainly driven by the Commercial, Small and Medium Enterprises ("SME") and Consumer Banking, which grew by 14.8%, 13.1% and 5.2%, respectively.

Other Operating Income

The Group recorded other operating income of RM267.1 million, lower by RM120.3 million or 31.1% YOY. The decrease was due to lower treasury and investment income arising from the challenging investment environment, and lower brokerage income, offsetted by higher trade fees and wealth management income.

Operating Expenses

Operating expenses increased by RM58.4 million or 7.1% YOY, mainly from the continued investments in the sales force, marketing cost and establishment cost. The cost-to-income ratio ("CIR") stood at 45.9% (FY2022: 44.1%).

The Group will continue to be vigilant in managing the cost in the coming financial year.

Asset Quality

The Group's allowance for expected credit losses on loans, advances, financing and other financial assets recorded a net charge of RM151.9 million, a decrease of RM65.5 million or 30.1% YOY. The net credit cost was at 31.9bps (FY2022: 48.1bps). Loan loss coverage (including regulatory reserves) was at 123.7% (FY2022: 141.5%).

Healthy Funding and Liquidity Position

The Group maintained a high current account/savings account ("CASA") ratio of 41.9%. Its customer-based funding stood at RM52.5 billion. Through our funding strategy, the Group's liquidity coverage and loans-to-funds ratios stood at 161.9% and 87.4%, respectively.

The Group will continue to maintain ample liquidity ratios and ensure sufficient liquidity buffers.

B2 Review Of Performance (Contd.)

Operating expenses increased by RM24.9 million or 7.9%. Allowance for expected credit losses was higher by RM53.1 million. Segment assets recorded at RM25.0 billion.

The Financial Markets segment recorded a profit before tax of RM282.2 million, a decrease of RM143.1 million or 33.6% YOY. Segment assets recorded at RM17.3 billion.

The Stockbroking and Corporate Advisory segment recorded a loss before tax of RM1.0 million mainly due to lower brokerage fees resulting from the disposal of the stockbroking business.

The Islamic Banking segment, which consists of consumer banking, business banking and financial markets, recorded a net profit after taxation of RM162.2 million, representing an increase of RM37.2 million or 29.8% YOY due to higher revenue from net profit income. B4 Economic and Business Outlook for Next Financial Year

For 2023, Bank Negara Malaysia ("BNM") forecasts Malaysia's gross domestic product ("GDP") growth to range between 4% and 5%, compared to a growth of 8.7% in the preceding year.

We expect Malaysia's economic growth trajectory to be supported by sustained domestic demand due to the continued improvement of the labour market conditions. We believe that further normalisation to the OPR will continue this year as the existing OPR of 2.75% remains below the pre-pandemic level.

Nevertheless, we remain cautious and mindful of downside risks to growth stemming from external uncertainties especially escalating geopolitical tensions and tightening financial conditions.

Notwithstanding the above, the Group expects to continue a positive financial performance going into FY2024 and remains on track in fulfilling the growth ambitions under ACCELER8. The Group will broaden its focus and expand into new areas beyond SMEs to accelerate its growth and pay more attention to consumer banking, wealth management and Islamic Banking. The Group will also continue to build strategic partnerships to widen its product offering and distribution, create more value for its customers and expand its business presence in fast-growing states and secondary cities to capture the growth opportunities of these economic corridors.

With prudent loans growth above the industry average, strong credit risk management, controlled loan loss provisions, strengthening the deposit/CASA proposition and cost management, the Group aims to launch itself into the top quartile in the industry for Return on Equity.

(i) The Group's and the Bank's derivative are subject to credit risk, market risk and liquidity risk as follow:

Credit Risk

Credit risk is the risk of financial loss resulting from the failure of the Group's borrowers or counterparties to fulfil their contractual obligations to repay their loans or settle commitments. Exposure to credit risk may be categorised as primary or secondary. This exposure is monitored on an on-going basis against predetermined counterparty limits. As at 31 March 2023, the amount of credit risk in the Group and the Bank, measured in terms of the cost to replace the profitable contracts, were RM221,141,000 and RM223,637,000 respectively (31 March 2022: RM86,294,000). This amount will increase or decrease over the life of the contracts, mainly as a function of maturity dates and market rates or prices.

B9 Derivative Financial Assets/(Liabilities) (Contd.)

- (i) The Group's and the Bank's derivative are subject to credit risk, market risk and liquidity risk as follow: (contd.)

Market Risk

Market Risk is the risk of loss of earnings arising from changes in interest rates, foreign exchange rates, equity prices, commodity prices and in their implied volatilities.

The Group has established a framework of approved risk policies, measurement methodologies and risk limits as approved by the Group Risk Management Committee to manage market risk. Market risk arising from the trading activities is controlled via position limits, loss limits, sensitivity limits and valuation via daily mark-to-market, where available.

Liquidity Risk

Liquidity risk is the inability of the Group and the Bank to meet financial commitments when due.

The Group's and the Bank's liquidity risk profile are managed using liquidity risk management strategies set in the Liquidity Risk Management Policy. Liquidity Risk Measures are monitored against approved threshold by Group Assets and Liabilities Management Committee and Group Risk Management Committee. A contingency funding plan is also established by the Group and the Bank as a forward-looking measure to ensure that liquidity risk can be addressed according to the degrees of key risk indicators, and which incorporates alternative funding strategies which are ready to be implemented on a timely basis to mitigate the impact of unforeseen adverse changes in liquidity in the market place.

- (ii) Cash Requirements of the Derivatives

Cash requirements of the derivatives may arise from margin requirements to post cash collateral with counterparties as the fair value moves beyond the agreed upon threshold limits in the counterparties' favour, or upon downgrade in the Group's and the Bank's credit ratings. As at 31 March 2023, the Group and the Bank had posted cash collateral of RM158,626,000 (31 March 2022: RM118,485,000) on their derivative contracts.

- (iii) Related accounting policies

Derivative financial instruments are initially recognised at fair value, which is normally zero or negligible at inception except for options and subsequently re-measured at their fair value. The fair value of options at inception is normally equivalent to the premium received (for options written) or paid (for options purchased). All derivatives are carried as assets when fair value is positive and as liabilities when fair value is negative. Changes in the fair value are recognised in the statement of comprehensive income.

Interest income and expenses associated with interest rate swaps are recognised over the life of the swap agreement as a component of investment income.

- (iv) There have been no changes since the end of the previous financial year in respect of the following:

- (a) the types of derivative financial contracts entered into and the rationale for entering into such contracts, as well as the expected benefits accruing from these contracts;
- (b) the risk management policies in place for mitigating and controlling the risks associated with these financial derivative contracts; and
- (c) the related accounting policies.
